

Year 1 Home Learning WB 30th March

Maths

This week we would like the children to focus on addition and subtraction. There is a booklet which you can download and work through, please only complete up to pg12. You can print it off, or if you don't have access to a printer then complete as much as possible in the green exercise book that was given out in the home learning packs.

English

We would like the children to create their own poster with instructions on for washing hands.

1. Look at a range of posters online that can give your child ideas about how to present their poster.
2. Discuss what they need to include in their poster, e.g. title, what you will need, numbered steps, etc.
3. Children are to create their poster including all the features.
4. Children could display their poster to help educate others.

Encourage you children to use their best handwriting and appropriate use of colour if they are drawing a picture.

Science

As we have been learning about animals including humans, please can you ask your child to name the young of some animals. Pick at least 3 animals and research what their young is called and any interesting facts you find out about them.

Creative

Design an Easter egg. This can be as creative as you like!

As always, please keep your children reading and read to them. Also, practise the 2,5 and 10 times tables. The children only need to chant these, such as '2,4,6,8...'

We hope that you are well and enjoying spending some quality time together where possible.

Miss Harnett, Miss Metcalfe, Miss Wood and Miss Morton.
